SUBJECT New Formula Renault 2.0 Solenoid + On-board Video Camera loom protection

PARTS Solenoid + On-Board Loom protection

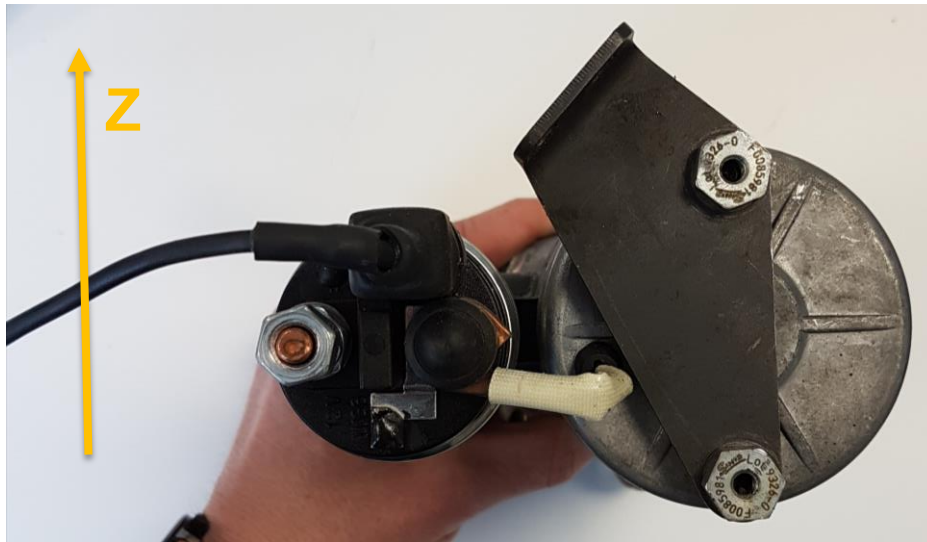

1. 2017 Solenoid - OPTIONAL

Renault Sport Racing introduces a new starter solenoid for 2017 season. This new solenoid has been design with our supplier in order to stop repetitive breakage occurred with old version.

- Reference: 82 01 710 991

This new solenoid is delivered ready to plug into the engine loom. This new solenoid is equipped with a remote connector (superseal 282103-1). Renault Sport Racing asks you to pay attention of the mounting direction: the connection where we have plug the remote connector is on top, switched over compared to previous versions.

2. On-board Video Camera Loom protection

Renault Sport Racing provided you at the end of Paul Ricard pre-season test an aluminum heat sheath sleeving (length 300mm) in order to protect GPS antenna + bullet cam looms (please be focus on the protection of the GPS antenna connection). It seems that this protection stopped problem multiple videos creation occurred during the first pre-season test in Magny-Cours. Thereby, we ask you to place back the GPS antenna in its original place, on the roll-hoop bracket designed for it. (Mandatory for first race in MONZA)
